

HEIDELBERG WALLBOX Home Eco Europe 11kW 5m

Licensed and approved for all European countries outside Germany (except Norway).

The Heidelberg Wallboxes are the **intelligent sockets** for your electric car because they ensure that it is **always reliably charged** at maximum speed.

Heidelberg Wallbox

With the **Heidelberg Wallboxes** you can charge electricity safely and conveniently. These high-performance charging systems charge the battery of your hybrid and electric vehicle quickly and reliably. **The installation of the wall boxes is easy and convenient.**

Specifications of WALLBOX

The **Wallbox** impresses with its easy and comfortable handling.

The high performance charging system guarantees a fast charging of your electric vehicle. A safe and intelligent socket with an elegant design for your electric car **No fear of expensive installation costs!** The integrated residual current detection reduces the risk to a minimum.

Type 2 electric and hybrid vehicles equipped according to IEC 62196-2 are suitable for the wallbox and all electric cars can be charged.

Protection class: IP54, splash proof

Height: 386mm

Width: 295mm

Depth: 117mm

Connection Supply cable:

2.5mm² to 6.00 mm², spring clamp technology

• Installation of an external locking device is possible

Serves Everywhere

- Connection to 230 volts (single-phase) or 400 volts (three-phase)
- **Type 2 socket**
- **Plug-and-play solution:** easy installation by electrician or installation service
- **Integrated residual current detection:** DC 6mA
- **Charging capacity (adjustable):** e.g. 2.1 kW/3.7 kW/7.2 kW/11 kW
- **Cable length:** 5 m
- Supports all electric and hybrid vehicles equipped with the type 2 charging socket
- Use of the charging station in all European countries (except Norway).

Caution: Please note that the Heidelberg Wallbox can only charge up to 11kW with a three-phase 400V connection. You can set the charging power using the rotary switch on the circuit board. Please check the rotary switch table on the info document.

Please note that only this **Heidelberg Wallbox** is approved and licensed for all European countries outside of Germany (except Norway). **Only with this the manufacturer assumes the guarantee and liability for an installation abroad!**

Information on the rotary switch positions

Rotary switch position	One-phase	Two-phase	Three-phase	Charging current amps
0	1,38 kW	2,76 kW	4,14 kW	6
1	1,84 kW	3,68 kW	5,52 kW	8
2	2,3 kW	4,6 kW	6,9 kW	10
3	2,76 kW	5,52 kW	8,28 kW	12
4	3,22 kW	6,44 kW	9,66 kW	14
5-9	3,68 kW	7,36 kW	11,04 kW	16
